General Data Protection Regulation: First Aid What do organisations that hold or process personal data need to know? From 25th May, 2018, the European Union's General Data Protection Regulation, GDPR for short, applies. It creates a completely new basis for all data protection in the European Union. The fines for breaches have been drastically increased. In

addition to large enterprises and other types of large scale organisation, small companies or free-lancers, small associations, clubs, societies and non-profit making organisations in many shapes and forms are entrusted with a lot of personal data - be it customer or client data, member data, employee data, or supplier data. Clubs and associations often have documentation that allows deep insights into the personal situation of their members. All organisations which hold or process this type of data are defined as "controllers" under the GDPR. It is therefore essential for the respective "controllers" to know the requirements of

the GDPR. This publication informs you concisely and clearly regarding the content and the mandatory requirements relating to data processing in the GDPR. In particular it answers the following questions: - Which data is covered by data protection? - Is it necessary to nominate a Data Protection Officer? - Which obligations to provide information must be fulfilled proactively? - What information needs to be included in the records of data processing activities? - When is it permissible to forward data to other persons or organisations? - Which special requirements are there for photographs on your own website? Templates and check

lists help you prepare and implement the legal requirements of the General Data Protection Regulation. Numerous examples demonstrate legal pitfalls and how to avoid them. This publication is aimed at owners of small companies, those responsible for data protection within small companies, chairpersons and members of clubs or associations and many other types of non-profit making organisation, as well as anyone else who wishes to gain a quick overview of the requirements of the data protection legislation. About the authors This publication was created by data protection experts. Dr. Eugen Ehmann is Vice-President of Central Franconia (Bavaria) and co-author of Ehmann/Selmayr, Kommentar zur DS-GVO (Commentary on the GDPR). Thomas Kranig is President of the Data Protection Authority of Bavaria for the Private Sector.

A Legal, Risk and Technology Framework for the GDPR IT Governance Ltd

This book provides a snapshot of privacy laws and practices from a varied set of jurisdictions in order to offer guidance on national and international contemporary issues regarding the processing of

personal data and serves as an up-to-date resource on the applications and practice-relevant examples of data protection laws in different countries. Privacy violations emerging at an ever-increasing rate, due to evolving technology and new lifestyles linked to an intensified online presence of ever more individuals, required the design of a novel data protection and privacy regulation. The EU General Data Protection Regulation (GDPR) stands as an example of a regulatory response to these demands. The authors included in this book offer an in-depth analysis of the national data protection legislation of various countries across different continents, not only including country-specific details but also comparing the idiosyncratic characteristics of these national privacy laws to the GDPR. Valuable comparative information on data protection regulations around the world is thus provided in one concise volume. Due to the variety of jurisdictions covered and the practical examples focused on, both academics and legal practitioners will find this book especially useful, while for compliance practitioners it can serve as a guide regarding transnational data

transfers. Elif Kiesow Cortez is Senior Lecturer at the International and European Law Program at The Hague University of Applied Sciences in The Netherlands.

An Implementation and Compliance Guide  
Kluwer Law International B.V.

Seminar paper from the year 2018 in the subject Law - Data protection, grade: 2,0, University of Applied Sciences Aalen, course: Emergent Issues in Governance, language: English, abstract: After nearly five years of intensive work, accompanied with charged political discussions and wide societal echo, the European Union's (EU) Data Protection Reform has finally become a reality. The new framework consists of a General Data Protection Regulation (GDPR), which replaced the former Data Protection Directive, and a new Directive for the police and criminal justice sector. They came into force in May 2016 and became applicable law in May 2018. The reform aims at modernizing and harmonizing data protection across the EU and is an essential element of the broader and particularly ambitious Digital Single Market Strategy that the EU launched in parallel and whose far-reaching consequences will unfold in the years to

come. As this new European Data Protection Regulation will obviously entail many changes for all kinds of companies in the EU and thus Germany, the aim of this seminar paper is to answer the following question: "What measures do German companies have to implement in order to meet the data protection requirements of the new EU GDPR, which is applicable since May 25th 2018?" To answer this question, first some important terms that play a role in the regulation are defined (e.g. privacy by design / privacy by default). Then a systematic literature analysis is carried out to identify the most important contents of the GDPR, such as possible penalties for non-compliance. In addition, it will be described how companies outside the EU will be affected by this European legislation. Next, it will be examined which are the crucial differences of the GDPR compared to the former German Bundesdatenschutzgesetz (BDSG), which documentary measures companies must implement as well as which infringements must be reported to supervisory authorities. Furthermore, the state of sources for this most current topic will be discussed by reviewing the various

types of literature (journals, scientific papers, professional service firm literature) used in this seminar paper. Last but not least, the most important results of this seminar paper are summarised and then, based on these conclusions, four theses are presented and substantiated. Finally an outlook is given on further regulations that are currently in the EU legislative process and will come into effect in the coming years.

### **General Data Protection Regulation (GDPR) for Privacy Professionals** Council of Europe

The EU's General Data Protection Regulation (GDPR) entered into force in May 2018. It is the most significant legal development in the sphere of privacy and data protection in the EU in the past 20 years. The ramifications of this new legislation are wide-ranging since they do not only affect the EU, but also every country that interacts with EU consumers. Now that the dust has settled, several questions have been raised: How does the GDPR interact with national and sectorial legislation? What triggers its extraterritorial application? How does the role of the Data Protection Officer function

in practice? How should companies deal with data subject access requests? How does data breach notification work and what is the role of Supervisory Authorities in this new era?00The book addresses all of these issues and many more through an eclectic mix of academic debate and practical considerations. Its unique approach explains the theory and reasoning behind every major GDPR development, and connects them to how these provisions work in practice. The book follows a disciplined structure in accordance with the GDPR and discusses the topical debates surrounding it in the past two years. It goes on to provide an outlook of what the future of privacy in the EU will look like as regards each of these contentious and rapidly emerging areas of the law, such as cross-border data transfer, privacy litigation and privacy activism.

#### PRIVACY AND DATA PROTECTION

Routledge

Personal data protection has become one of the central issues in any understanding of the current world system. In this connection, the European Union (EU) has created the most sophisticated regime currently in force with the General Data Protection Regulation (GDPR) of 2016. This book on this major data protection reform offers a comprehensive discussion of all principles of personal data processing, obligations of data controllers and rights of data subjects. This is the core of the

personal data protection regime. GDPR is applicable directly in all Member States, providing for a unification of data protection rules within the EU. However, it poses a problem in enabling international trade and data transfers outside the EU between economies which have different data protection models in place. Among the broad spectrum of aspects of the subject covered are the following: - summary of the changes introduced by the GDPR; - new territorial scope; - key principles of personal data processing; - legal bases for the processing of personal data; - marketing, cookies and profiling; - new information clauses; - new Subject Access Requests (SARs), including the 'right to be forgotten' on the Internet, the right to data portability and the right to object to profiling; - new data protection by design and by default; - benefits from implementing a data protection certificate; and - data transfers outside the EU, including BCRs, SCCs and special features of EU-US arrangements. This book references many rulings of European courts, as well as interpretations and guidelines formulated by European data protection authorities, examples and best

practices, making it of great practical value to lawyers and business leaders. Because of the increase in legal certainty in this area guaranteed by the GDPR, multinational corporations and their customers and contractors will benefit enormously from consulting and using this book. For practitioners and academics, researching or advising clients on this area, and government policy advisors, this book provides an indispensable source of guidance and information for many years to come.

GDPR: Personal Data Protection in the European Union Mariusz Krzysztofek  
Personal data protection has become one of the central issues in any understanding of the current world system. In this connection, the European Union (EU) has created the most sophisticated regime currently in force with the General Data Protection Regulation (GDPR) (EU) 2016/679. Following the GDPR's recent reform - the most extensive since the first EU laws in this area were adopted and implemented into the legal orders of the Member States - this book offers a comprehensive discussion of all principles of personal data processing, obligations of data controllers, and rights of data subjects, providing a thorough, up-to-date account of the legal and practical aspects of personal data protection in the EU. Coverage includes the recent Court of Justice of the European Union (CJEU) judgment on data transfers and new or updated data protection authorities' guidelines in the EU Member States.

Among the broad spectrum of aspects of the subject covered are the following: - right to privacy judgments of the CJEU and the European Court of Human Rights; - scope of the GDPR and its key definitions, key principles of personal data processing; - legal bases for the processing of personal data; - direct and digital marketing, cookies, and online behavioural advertising; - processing of personal data of employees; - sensitive data and criminal records; - information obligation & privacy notices; - data subjects rights; - data controller, joint controllers, and processors; - data protection by design and by default, data security measures, risk-based approach, records of personal data processing activities, notification of a personal data breach to the supervisory authority and communication to the data subject, data protection impact assessment, codes of conduct and certification; - Data Protection Officer; - transfers of personal data to non-EU/EEA countries; and - privacy in the Internet and surveillance age. Because the global scale and evolution of information technologies have changed the data processing environment and brought new

challenges, and because many non-EU jurisdictions have adopted equivalent regimes or largely analogous regulations, the book will be of great usefulness worldwide. Multinational corporations and their customers and contractors will benefit enormously from consulting and using this book, especially in conducting case law, guidelines and best practices formulated by European data protection authorities. For lawyers and academics researching or advising clients on this area, this book provides an indispensable source of practical guidance and information for many years to come. *Trust, Privacy and Security in Digital Business* World Scientific Publishing Company

The rapid development of information technology has exacerbated the need for robust personal data protection, the right to which is safeguarded by both European Union (EU) and Council of Europe (CoE) instruments. Safeguarding this important right entails new and significant challenges as technological advances expand the frontiers of areas such as surveillance, communication interception and data storage. This handbook is designed to familiarise legal practitioners not specialised in data protection with this emerging area of the law. It provides an overview of the EU's and the CoE's applicable legal frameworks. It also explains key case law, summarising major rulings of both the Court of Justice of the European Union and the European Court of Human Rights. In addition, it presents hypothetical scenarios that serve as practical illustrations of the diverse issues encountered in this ever-evolving field. *Guide to the GDPR* Kluwer Law International B.V.

To execute and guarantee the right to privacy and data protection within the European Union (EU), the EU found it necessary to establish a stable, consistent framework for personal data protection and to enforce it in a decisive manner. This book, the most comprehensive guide available to the General Data Protection Regulation (GDPR), is the first English edition, updated and expanded, of a bestselling book published in Poland in 2018 by a renowned technology lawyer, expert to the European Commission on cloud computing and to the Article 29 Working Party (now: the European Data Protection Board) on data transfers who in fact contributed ideas to the GDPR. The implications of major innovations of the new system – including the obligation of

businesses to consult the GDPR first rather than relevant Member State legislation and the extension of the GDPR to companies located outside of the European Economic Area – are fully analysed for the benefit of lawyers and companies worldwide. Among the specific issues and topics covered are the following: insight into the tricky nature of the GDPR; rules relating to free movement of personal data; legal remedies, liability, administrative sanctions; how to prove compliance with GDPR; direct liability of subcontractors (sub-processors); managing incidents and reporting data breaches; information on when and under what conditions the GDPR rules may apply to non-EU parties; backups and encryption; how to assess risk and adjust security accordingly and document the process; guidelines of the European Data Protection Board; and the GDPR's digest for obligated parties in a form of a draft data protection policy. The Guide often breaks down GDPR articles into checklists of specific requirements. Of special value are the numerous ready-to-adapt template compliance documents presented in Part II. Because the GDPR contains a set of new

obligations and a perspective of severe administrative fines for non-compliance, this guide is an indispensable practical resource for corporate data protection officers, in-house counsel, lawyers in data protection practice, and e-commerce start-ups worldwide.

GDPR: General Data Protection Regulation (EU) 2016/679 Oxford University Press, USA

This new book provides an article-by-article commentary on the new EU General Data Protection Regulation. Adopted in April 2016 and applicable from May 2018, the GDPR is the centrepiece of the recent reform of the EU regulatory framework for protection of personal data. It replaces the 1995 EU Data Protection Directive and has become the most significant piece of data protection legislation anywhere in the world. The book is edited by three leading authorities and written by a team of expert specialists in the field from around the EU and representing different sectors (including academia, the EU institutions, data protection authorities, and the private sector), thus providing a pan-European analysis of the GDPR. It examines each article of the GDPR in

sequential order and explains how its provisions work, thus allowing the reader to easily and quickly elucidate the meaning of individual articles. An introductory chapter provides an overview of the background to the GDPR and its place in the greater structure of EU law

and human rights law. Account is also taken of closely linked legal instruments, such as the Directive on Data Protection and Law Enforcement that was adopted concurrently with the GDPR, and of the ongoing work on the proposed new E-

Privacy Regulation.
