How to prepare for CAT - MBA Entrance Exam Disha Publications

Martin's Physical Pharmacy and Pharmaceutical Sciences is considered the most comprehensive text

available on the application of the physical, chemical and biological principles in the pharmaceutical

sciences. It helps students, teachers, researchers, and industrial pharmaceutical scientists use

elements of biology, physics, and chemistry in their work and study. Since the first edition was

published in 1960, the text has been and continues to be a required text for the core courses of

Pharmaceutics, Drug Delivery, and Physical Pharmacy. The Sixth Edition features expanded content

on drug delivery, solid oral dosage forms, pharmaceutical polymers and pharmaceutical

biotechnology, and updated sections to cover advances in nanotechnology.

[Numerical Chemistry](#) Springer Nature

Pharmaceutics is one of the most diverse subject areas in all of pharmaceutical science. In brief, it is

concerned with the scientific and technological aspects of the design and manufacture of dosage

forms or medicines. An understanding of pharmaceutics is therefore vital for all pharmacists and

those pharmaceutical scientists who are involved with converting a drug or a potential drug into a

medicine that can be delivered safely, effectively and conveniently to the patient. Now in its fourth

edition, this best-selling textbook in pharmaceutics has been brought completely up to date to

reflect the rapid advances in delivery methodologies by eye and injection, advances in drug

formulations and delivery methods for special groups (such as children and the elderly),

nanomedicine, and pharmacognosy. At the same time the editors have striven to maintain the

accessibility of the text for students of pharmacy, preserving the balance between being a suitably

pitched introductory text and a clear reflection of the state of the art. provides a logical,

comprehensive account of drug design and manufacture includes the science of formulation and

drug delivery designed and written for newcomers to the design of dosage forms New to this edition

New editor: Kevin Taylor, Professor of Clinical Pharmaceutics, School of Pharmacy, University of

London. Twenty-two new contributors. Six new chapters covering parenteral and ocular delivery;

design and administration of medicines for the children and elderly; the latest in plant medicines;

nanotechnology and nanomedicines, and the delivery of biopharmaceuticals. Thoroughly revised

and updated throughout.

When you start preparation of GPAT and NIPER, automatically you get prepared for Drug Inspector

Examinations. First of all give importance to the GPAT, because the preparation strategy is different for Drug Inspector, GPAT and NIPER. Whereas GPAT concentrate on subject knowledge deeply and it is somewhat time taking to answer the questions when compare to the NIPER in which concentrate only on basics of subject especially in organic and stereo chemistry and analytical chemistry. And also when you qualified in GPAT then only you will be eligible for NIPER. If you Dream to Become Drug Inspector, You Need to Start Preparations ... Today Itself...!!!! Dare to Dream and Dare to Try... Then No Star is Too High...!!!!

Guide for NIFT/NID/IIFT 2021 Tata McGraw-Hill Education

A comprehensive textbook covering the design of dosage forms and all aspects of drug delivery systems. 'Pharmaceutics' in its broadest sense is the 'art of the apothecary' or, in simple terms, pharmaceutical preparations. It remains a diverse subject in the pharmacy curriculum, encompassing design of drugs, their manufacture, and the elimination of micro-organisms from the products. This books encompasses all those areas and pays particular attention to the design of dosage forms and their manufacture.

Pharmacological Classification of Drugs Educreation Publishing

From Carnegie Medal finalist Jenny Valentine comes a bold new story about the boundlessness of love and second chances, perfect for fans of David Levithan's Every Day. Jude doesn't believe in love, or magic. Life is little more than ordinary. That is, until Jude's mother loses her job and moves them to a little town by the sea to live with Henry Lake--an eccentric old man with rooms to rent. Henry is odd, the town is dull, and worst of all, Jude feels out of place and alone. So when Novo turns up in the house across the street, dressed all in black and looking unbearably handsome, Jude's summer takes an immediate turn for the better. But Novo isn't all that he seems to be--or maybe he's more than Jude can possibly understand. Novo is pure magic--someone who can bend and stretch the bounds of time. Someone who wakes up in different places and at different points in history with utter regularity. He knows that each Now is fleeting, that each moment is only worth the energy it expends on itself, and that each experience he has will be lost to him before long. But Jude and Novo form a bond that shifts reality for both of them. Jude begins to question what forever really means--only to find out that Novo knows that forever isn't real. And when things go horribly wrong, Jude and Novo are faced with an impossible question that may change both of their lives irreparably--what is worth sacrificing for love? A stunningly written, compelling exploration of the universality of love--and what it means to live in the moment--that quite literally defies both logic and time. A love story without borders that reflects the best of our modern world. Praise for Hello Now: * "Babbitt's Tuck Everlasting revisioned as a passionate YA love story, this is an exquisitely told romantic fantasy, golden yet lacerating." --BCCB, STARRED REVIEW
