*The Modern Era. Alienation and Desperation in Ezra Pound's "In a  
Station of the Metro" and Edward Hopper's "Automat" The  
Stationery Office*  
Written in clear and accessible prose, GLOBAL POLITICS discusses  
the major theories of international relations and provides students  
with the historical background to understand global politics. The

new edition is a thorough revision and reflects the latest  
developments in world events and the study of international  
relations. The text is organized into five parts: theory and history,  
states and foreign policy, security relations, economic relations,  
and global challenges. It focuses on today's most urgent issues,  
such as international conflict, economic alliances, and terrorism  
and global security. A theoretical chapter on global politics covers  
six major perspectives on international relations and clearly  
explains the premise and significance of each theory. Important

### **THE HISTORY OF ROME (Complete Edition in 4 Volumes)** Routledge

Written by award-winning scholar, Jonathan Turner, Contemporary  
Sociological Theory covers the range of diversity of theory in nine  
theoretical traditions, and variants of theoretical approaches in  
these traditions. The result is a comprehensive review of present-  
day theorizing in sociology covering functional, evolutionary,  
ecological, conflict, interactionist, exchange, structuralist,  
cultural, and critical theories and the major proponents of these  
theories. Moreover, for each theoretical tradition, its origins are  
examined in a separate chapter with an eye to how classical  
theorists influenced the work of key contemporary scholars. This  
book will serve as a valuable resource for those readers seeking  
in-depth and comprehensive coverage of contemporary traditions  
in their historical contexts. Unlike many texts, coverage is  
comprehensive and deep. The theories and their origins are  
examined in detail so that readers can fully understand the  
origins and present profile of theories in present-day sociology.  
Unlike many texts that skim over theories on the surface, this  
book seeks to unlock for the reader their underlying structure of  
each theory. The book is written in a modular format so that

theories and traditions can be examined in any order, and in  
many diverse combinations. If desired, only the contemporary  
theories can be read without attention to their historical contexts,  
or the reverse is true if readers want to understand the historical  
origins of a particular theoretical tradition. Since Jonathan Turner  
is an active theorist in his own right, he brings to the book an  
appreciation of how theories are created as an insider rather than  
as only a commentator on theory. As such, he is able to bring out  
the underlying assumptions, structure, and form of a theory in  
new and interesting ways for casual readers and scholars alike.

This is the third edition of this publication which contains the  
latest information on vaccines and vaccination procedures for all  
the vaccine preventable infectious diseases that may occur in the  
UK or in travellers going outside of the UK, particularly those  
immunisations that comprise the routine immunisation  
programme for all children from birth to adolescence. It is divided  
into two sections: the first section covers principles, practices and  
procedures, including issues of consent, contraindications,  
storage, distribution and disposal of vaccines, surveillance and  
monitoring, and the Vaccine Damage Payment Scheme; the  
second section covers the range of different diseases and  
vaccines.

Responding to the dual pressures of globalization and economic  
downturn, communities across the world formerly driven by  
agriculture and industry are increasingly turning toward tourism  
as an economic mainstay. In order for industry leaders to  
compete with the efforts of competitors and savvy marketers,  
new business models must be defined which allow for the

incorporation of e-tourism tools and expansion into the global marketplace. *New Business Opportunities in the Growing E-Tourism Industry* offers case studies and research that highlights the impact of globalization on travel and tourism and offers solutions to potential problems. Targeting an audience of researchers and business professionals, this volume brings together a diverse international body of scholars and researchers to provide a holistic perspective of future developments in the e-tourism industry. This volume compiles the research and perspectives of researchers and industry professionals, uniting a variety of topics including medical tourism, traffic-management, route-planning, virtual museums, digital spot-hunting via film-mosaic, and tourism for the elderly and disabled.

*Modern History Sourcebook: Thomas Hobbes: Leviathan, Chaps 13-14, 1651* Vernon Press

The modern concept and study of civilization have their roots, not in western Europe, but in the spirit of scientific investigation associated with a self-conscious Islamicate civilization. What we call modernity cannot be fathomed without this historical connection. We owe every major branch of science known today to the broad tradition of systematic inquiry that belongs to a “region of being”—as Heidegger would say—whose theoretical, practical and institutional dimensions the philosophy of that civilization played an unprecedented role in creating. This book focuses primarily on the philosophical underpinnings of questions relating to civilization, personhood and identity. Contemporary society and thinking in western Europe introduced new elements to these questions that have altered how collective and personal identities are conceived and experienced. In the age of “globalization,” expressions of identity (individual, social and cultural) survive precariously outside their former boundaries, just when humanity faces perhaps its greatest challenges—environmental degradation, policy inertia, interstate bellicosity, and a growing culture of tribalism. Yet, the world has been globalized for at least a millennium, a fact dimmed by the threadbare but still widespread belief that modernity is a product of something called the West. One is thus justified in asking, as many people do today, if humanity has not lost its initiative. This is more a philosophical than an empirical question. There can be no initiative without the human agency that flows from identity and personhood—i.e., the way we, the acting subject, live and

deliberate about our affairs. Given the heavy scrutiny under which the modern concept of identity has come, Dr. Shaker has dug deeper, bringing to bear a wealth of original sources from both German thought and Hikmah (Islamicate philosophy), the latter based on material previously unavailable to scholars. Posing the age-old question of identity anew in the light of these two traditions, whose special historical roles are assured, may help clear the confusion surrounding modernity and, hopefully, our place in human civilization. Proximity to Scholasticism, and therefore Islamicate philosophy, lent German thought up to Heidegger a unique ability to dialogue with other thought traditions. Two fecund elements common to Heidegger, Qūnawī and Mullā Ṣadrā are of special importance: Logos (utterance, speech) as the structural embodiment at once of the primary meaning (essential reality) of a thing and of divine manifestation; and the idea of unity-in-difference, which Ṣadrā finally formulated as the substantial movement of existence. But behind this complexity is the abiding question of who Man is, which cannot be answered by theory alone. Heidegger, who occupies a good portion of this study, questioned the modern ontology at a time of social collapse and deep spiritual crisis not unlike ours. Yet, that period also saw the greatest breakthroughs in modern physics and social science. The concluding chapters take up, more specifically, identity renewal in Western literature and Muslim “reformism.” The renewal theme reflects a point of convergence between the Eurocentric worldview, in which modernism has its secular aesthetics roots, and a current originating in Ibn Taymiyyah’s reductionist epistemology and skeptical fundamentalism. It expresses a hopeless longing for origin in a historically pristine “golden age,” an obvious deformation of philosophy’s millennial concern with the commanding, creative oneness of the Being of beings.

The origin of capitalism and modern industrialism--and, not unrelated, the birthplace of Marxism--modern Europe provided the perfect conditions for a great number of political revolutions. From the monarchical terror of the Middle Ages to the mangled Europe of the twenty-first century, *A People's History of Modern Europe* tracks the history of the continent through the deeds of those whom mainstream history tries to forget. Along the way, William A. Pelz examines the German peasant wars of Thomas M

ntzer, the bourgeoisie revolutions of the eighteenth century, the rise of the industrial worker in England, the turbulent journey of the Russian Soviets, the role of the European working class throughout the Cold War, and the revolutionary students in 1968. He then brings his story to the present day, where we continue to fight to forge an alternative to a heartless and often barbaric economic system. As Germany and Greece argue over who owes what, with the very idea of Europe crumbling around them, Pelz's accessible, provocative history could not be timelier. Sure to resonate with fans of books like Howard Zinn's *A People's History of the United States*, this people's history sweeps away the tired platitudes of the privileged and provides an opportunity to understand the story of Europe from the ground up.

This book presents extensive new research findings on and new thinking about Southeast Asia in this interesting, richly diverse, but much understudied period. It examines the wide and well-developed trading networks, explores the different kinds of regimes and the nature of power and security, considers urban growth, international relations and the beginnings of European involvement with the region, and discusses religious factors, in particular the spread and impact of Christianity. One key theme of the book is the consideration of how well-developed Southeast Asia was before the onset of European involvement, and, how, during the peak of the commercial boom in the 1500s and 1600s, many polities in Southeast Asia were not far behind Europe in terms of socio-economic progress and attainments.

The world is in a second nuclear age in which regional powers play an increasingly prominent role. These states have small nuclear arsenals, often face multiple active conflicts, and sometimes have weak institutions. How do these nuclear states—and potential future ones—manage their nuclear forces and influence international conflict? Examining the reasoning and deterrence consequences of regional power nuclear strategies, this book demonstrates that these strategies matter greatly to international stability and it provides new insights into conflict dynamics across important areas of the world such as the Middle East, East Asia, and South Asia. Vipin Narang identifies the diversity of regional power nuclear strategies and describes in detail the posture each regional power has adopted over time. Developing a theory for the sources of regional power nuclear strategies, he offers the first systematic explanation of why states choose the postures they do and under what conditions they might shift strategies. Narang then analyzes the effects of these choices on a state's ability to deter conflict. Using both quantitative and qualitative analysis, he shows that, contrary to a bedrock article of faith in the canon of nuclear deterrence, the acquisition of nuclear weapons does not produce a uniform

deterrent effect against opponents. Rather, some postures deter conflict more successfully than others. Nuclear Strategy in the Modern Era considers the range of nuclear choices made by regional powers and the critical challenges they pose to modern international security.

For some people the Labour Party is a heroic institution, which created the NHS, built homes for the poor and brought social justice to all. For others Labour is an enemy of liberty and will be forever associated with ineptitude, economic mismanagement, and unrealistic dreams. For some Labour helped make Britain a great and progressive country whilst some believe that Labour is solely responsible for its demise. This book charts the rise of the Labour Party to the the modern day and argues that while Labour has helped made Britain great, it hasn't got everything right. In these days of UKIP and David Cameron, this biased little book proudly presents Labour's incredible achievements. But it doesn't let Labour off the hook for its mistakes, exploring issues that some politicians will find cringe worthy and would rather have deleted from the official story. This book is the fourth volume in the definitive series, The History of the Study of Landforms or The Development of Geomorphology. Volume 1 (1964) dealt with contributions to the field up to 1890. Volume 2 (1973) dealt with the concepts and contributions of William Morris Davis. Volume 3 (1991) covered historical and regional themes during the 'classic' period of geomorphology, between 1980 and 1950. This volume concentrates on studies of geomorphological processes and Quaternary geomorphology, carrying on these themes into the second part of the twentieth century, since when process-based studies have become so dominant. It is divided into five sections. After chapters dealing with geological controls, there are three sections dealing with process and form: fluvial, glacial and other process domains. The final section covers the mid-century revolution, anticipating the onset of quantitative studies and dating techniques. The volume's objective is to describe and analyse many of the developments that provide a foundation for the rich and varied subject matter of contemporary

geomorphology. The volume is in part a celebration of the late Professor Richard Chorley, who devised its structure and contributed a chapter.
