River Pollution Oxford University Press
An easy-to-read, beautifully illustrated undergraduate-level introduction to fresh- and running-water biology. Each chapter includes practical information on simple studies and experiments for students to try. The text begins with the physical features that define running water (lotic) habitats then continues with organisms that inhabit these habitats, and concludes with a discussion of applied issues surrounding water use, including pollution, species diversity, and conservation. The authors outline the range of living organisms in lotic habitats, and the environmental adaptations they exhibit. They discuss population, community, and ecosystem patterns and processes, such as energy flow, nutrient cycling, migration, food webs, and community structure. Particular consideration is given to links between stream and river channels and their surrounding landscapes, to short-term and seasonal changes, and to historical and biogeographical factors. The text concludes with a section of additional practical field work activities and a list for further reading.

Bank Street College of Education professor Salvatore Vascellaro is a leading advocate of taking children and teachers into a wider world as the key to improving our struggling schools. Combining practical and theoretical guidance, *Out of the Classroom and into the World* visits a rich variety of classrooms transformed by innovative field trip curricula—showing how students' hearts and minds are opened as they discover how a suspension bridge works, what connects them to the people and places of their neighborhood, and as they come to understand the ecosystem of a river by following it to its source. Vascellaro shows, equally, that what teachers can offer children is fueled by their own engagement with the world, and he offers stunning examples of teachers awakened by their direct experiences with the social issues plaguing American society—from the flood-torn areas of New Orleans to the mining areas of West Virginia. Based on the core principles of progressive pedagogy, and the wisdom gained from Vascellaro's experience as a teacher, school administrator, and teacher educator, *Out of the Classroom and into the World* is a direct retort to test scores and standards as adequate measures of teaching and learning—an inspiring call and major new resource for anyone interested in reinvigorating America's classrooms.

"Drawing on a major new source of data - the National Longitudinal Survey of Freshmen - the authors undertake a comprehensive analysis of the diverse pathways by which whites, African Americans, Latinos, and Asians enter American higher education. This is the first study to document the different characteristics that students bring to campus and to trace out the

influence of these differences on later academic performance. They show that black and Latino students do not enter college disadvantaged by a lack of self-esteem. In fact, overconfidence is more common than low self-confidence among some minority students. Despite this, minority students are adversely affected by racist stereotypes of intellectual inferiority. Although academic preparation is the strongest predictor of college performance, shortfalls in academic preparation are themselves largely a matter of socioeconomic disadvantage and racial segregation."--BOOK JACKET.

The Sunday School Teacher's Guide Canongate Books
The macaronic (mixed-language) business texts of London for the period 1275 to 1500 present a rich source of evidence for the medieval dialect of London English. Hitherto they have been ignored because of mistaken ideas about their value: they have been viewed as bastardized forms produced by ill-educated scribes. We cannot dismiss macaronic documents as debased or degenerate without investigation, nor should we underestimate the evidence they present for the development of the English language. The contemporary importance of these documents is attested by their sheer number - it is easier today to find macaronic business documents from the late medieval period in record offices than it is to find monolingual texts. The book focuses on terminology surrounding the River Thames to present a study of the medieval dialect of London. The vocabulary survey lists many words which had previously been lost to us, and the illustrative extracts from the texts present a fascinating picture of life in medieval times on the River Thames. The author's analysis covers the orthography, phonology, and morphology of the dialect as revealed in these texts.

Describes and discusses the vegetation of rivers and other watercourses in Europe with an emphasis on distributional, community, and historical ecology. Its main purpose is to increase our understanding of river vegetation in relation to the varying physical characteristics of the watercourse. The book considers the rivers of the EEC in detail and highlights the influence of landscape, geology, climate, settlement patterns, water use and management, and pollution. All of these factors vary widely over the region and affect the vegetation, which is well described from about 30,000 site records. A text for undergraduates. The focus is on plant communities in European watercourses. Illustrated with line drawings. Printed on paper of insufficient opacity. Distributed by Columbia U. Press. Crossing the Same River Thomas Dunne Books

Hardbound. This multidisciplinary book by the author of *The Geology of Egypt* is the result of many years of research. It attempts to reconstruct the history of the River Nile from its origins to its present shape and regimen and also to ascertain the amount of water which has been carried by the river during the course of its history. It examines the manner in which this water was utilized in the past and the ways in which it will have to be used in future if the inhabitants of the river basin are to cope with their anticipated needs. Part One traces the geological history of the Nile from the time it started to excavate its valley some six million years ago until the present shape was assumed during the wet period which affected Africa after the retreat of the ice of the last glacial age some 10,000 years ago. Part Two deals with the amount of water that the river and its tributaries carry at present and have carried in the past. Part Three

INTRODUCTION, CONTAINING A BRIEF ACCOUNT OF THE ORIGIN, PROGRESS, AND IMPROVEMENT OF THE SUNDAY SCHOOL SYSTEM OF EDUCATION. TO TRACE A MIGHTY RIVER TO ITS SOURCE, HAS EVER BEEN CONSIDERED A SUBLIME AND INTERESTING EMPLOYMENT. IT IS PLEASING TO ASCEND ITS COURSE FROM THE POINT WHERE IT OPENS INTO THE OCEAN, AND BECOMES THE INLET OF WEALTH TO AN EMPIRE, TILL WE ARRIVE AT THE SPOT, WHERE IT BUBBLES UP A SPRING BUT JUST SUFFICIENT TO IRRIGATE THE MEADOWS OF A NEIGHBOURING FARM, AND TO OBSERVE, AS IT RECEIVES THE CONFLUENCE OF TRIBUTARY WATERS, HOW IT DIFFUSES ITS BENEFITS TO THE TRIBES THAT DWELL UPON ITS BANKS. STILL MORE ENGAGING IS THE TASK, TO TRACE THE STREAMS OF BENEVOLENCE TO THEIR SOURCE, AND CONTEMPLATE THE ORIGIN OF THOSE INSTITUTIONS, WHICH IN THEIR PROGRESS TO THE SWELLING TIDE OF CHRISTIAN KNOWLEDGE, CONFER ETERNAL BLESSINGS ON IMMORTAL SOULS. FOR WHAT IS THE NILE OR THE NIGER; THE MISSOURI, THE EUFRATES, OR THE THAMES, COMPARED WITH THE RIVER OF LIFE? THE SMALLEST RIVULET WHICH FLOWS INTO THIS CELESTIAL STREAM, HAS MORE SUBLIMITY AND IMPORTANCE THAN THE MIGHTIEST RIVERS UPON EARTH, AND WILL BE TRACED WITH THE DEEPEST INTEREST UPON THE MAP OF THE REDEEMER'S KINGDOM, MILLIONS OF AGES AFTER THE OCEAN ITSELF SHALL BE DISSIPATED INTO NOTHING. JUSTLY THEREFORE, MAY IT BE ACCOUNTED AN OBJECT WORTHY OUR ATTENTION TO TRACE, BY A RAPID SURVEY, THE ORIGIN, THE PROGRESS, AND IMPROVEMENT OF THE SUNDAY SCHOOL, INSTITUTION. TO THE GREATER PART OF THOSE WHO ARE EMPLOYED IN DIFFUSING THE BENEFITS OF THIS ADMIRABLE SYSTEM, IT IS ALMOST IMPOSSIBLE TO FORM AN ADEQUATE IDEA OF THE EXTREME IGNORANCE OF THE POOR, BEFORE ITS INTRODUCTION. EXCEPT WHERE A HIPPIY FEW OF THEIR CHILDREN WERE GATHERED BENEATH THE WINGS OF SOME CHARITABLE INSTITUTION, THE...

The awe-inspiring story of explorer David Thompson, whose expeditions helped shape western North America In this true story of adventure, author Jack Nisbet re-creates the life and times of David Thompson—fur trader, explorer, surveyor, and mapmaker. From 1784 to 1812, Thompson explored western North America, and his field journals provide the earliest written accounts of the natural history and indigenous cultures of the what is now British Columbia, Alberta, Montana, Idaho, Washington, and Oregon. Thompson was the first person to chart the entire route of the Columbia river, and his wilderness expeditions have become the stuff of legend. Jack Nisbet tracks the explorer across the content, interweaving his own observations with Thompson's historical writings. The result is a fascinating story of two men discovering the Northwest territory almost two hundred years apart.

The Secret River London : Vallentine, Mitchell

The authors recount twelve millennia of history along the lower San Juan River, much of it the story of mostly unsuccessful human attempts to make a living from the river's arid and fickle environment. From the Anasazi to government dam builders, from

Navajo to Mormon herders and farmers, from scientific explorers to busted miners, the San Juan has attracted more attention and fueled more hopes than such a remote, unpromising, and muddy stream would seem to merit.
