In the United States,

social class ranks with gender, race, and ethnicity in determining the values, activities, political behavior, and life chances of individuals. Most scholars agree on the importance of class, although they often disagree on what it is and how it impacts Americans. This A-Z encyclopedia, the first to focus on class in the United States, surveys the breadth of class strata throughout our history, for high school students to the general public. Class is illuminated in 525 essay entries on significant people, terms, theories, programs, institutions, eras, ethnic groups, places, and much more. This useful set is an authoritative, fascinating source for

in-demand information on key aspects of our culture and society and helps researchers to narrow down a broad topic. Class is revealed from angles that often intersect: through history, with entries such as Founding Fathers, the Industrial Revolution, Westward Expansion; through economics, with entries such as Dot.com Bubble, Robber Barons, Chicago School of Economics, Lottery, Wage Slaves, Economic Equal Opportunity Act, Stock Market, Inheritance Taxes, Wal-Mart, Welfare; through social indicators such as Conspicuous Consumption, the Hamptons, WASP, Homelessness, Social Climbing; through politics with entries

such as Anarchism, Braceros, Heritage Foundation, Communist Party, Kennedy Family; and through culture through entries such as Country Music, The Great Gatsby, Television, and Studs Terkel. Class is also approached from ethnic, sexual, religious, educational, and regional angles. Special features include an introduction, timeline, suggested reading per entry, cross-references, reader's guide to topics, and thorough index. Sample entries: Immigration, Education, Labor Movement, Pink-Collar Workers, AFL-CIO, Strikes, Great Depression, Jacob Riis, Literature, the Rockefellers, Slavery, Music, Academia,

Who Is Bill Gates?

ESSAY: The focus of this essay is on Bill Gates as a creative, gifted and talented person (business & entrepreneurship). An easy and very interesting read.

SEATTLE - If you spend time with the Gates family it is most probable that someone will mention the "water incident". The future software guru was a headstrong 12-year-old and was having a particularly nasty argument with his mother at the dinner table. His father lost his cool and threw a glass of cold water in

the boy's face. The young boy snapped back with something like this: "Hey thanks for the shower!" (Guth, 2009) Behind the Bill Gates, a success story, is the other William Gates (Sr.), his father. It is the story of his father about the young Gates junior's early years and the raising of Bill (Jr.) that generates interest by almost everyone. Questions like: 'How did he grow up?'; 'What was his life like as a child in the Gates household?'; and 'What was he like in senior high school?' In this case study, I will look primarily at "Raising the young Gates" and I will endeavor to identify patterns and traits of giftedness, talent, and creativity which could be linked to the work of Renzulli (1986),

Simonton (2000), Sternberg (2006), and Csikszentmihalyi (1999a). In the second section, I will look at some influences, time frames, historical, political, economic and social events that shaped the wealthy and very successful Bill Gates (Jr.) to become one of the wealthiest men and most influential men in the world Executive Summary This case study assesses, analyses, and discusses the prosperous life of the entrepreneur Bill Gates (Founder of Microsoft software) as an intelligent, gifted and talented person. The work of Simonton (2000), Sternberg (2006), Renzulli (1986) Csikszentmihalyi (1999a), on talented and gifted persons,

shows that Bill Gates fits into three of the four categories outlined by Riley et al. (2004) Ministry of Education (New Zealand), namely: 1. Intellectual/Academic refers to students with exceptional abilities in one or more of the learning areas (i.e., English, the arts, health and physical education, learning languages, mathematics and statistics, science, social sciences, and technology). 2. Creativity refers to students with general creative abilities as evidenced in their abilities to problem-find and problem-solve, and their innovative thinking and productivity. 3. Social/Leadership refers to students with interpersonal and intra-

personal abilities and qualities, which enable them to act in leadership roles.

How Ordinary People Become Great? & Why Great Men Fall? Matt Green

"Simple text and photographs present the life of Bill Gates, founder of Microsoft"--The Life and Times of Bill Gates ABC-CLIO
"Our slogan from the very beginning was 'a computer on every desk and in every

home." "For me to become gun-shy might require surgery." An icon more powerful than anything on a Windows screen, Bill Gates today stands atop his fabled Microsoft fortress staring down competitors' threats and injunctions from an annoyed U.S. Justice Department. The kind of success Gates has created rarely escapes criticism. And Bill is getting more than his share. The story of how this Harvard dropout created the operating system that would become the worldwide standard for millions of computers is legendary. And equally legendary has been the take-no-prisoners tactics of his corporate colossus, Microsoft. We've witnessed Gates's transformation

from a geeky wunderkind into a business titan. Whether admired or detested, glorified or vilified, Gates is a household name and a worldwide curiosity. Bill Gates Speaks discloses what Bill Gates has to say on everything from financing a start-up to running a conglomerate, developing technology to raising a family, and growing his business to expanding his personal wealth. Drawing on quotes culled from speeches, articles, essays, newscasts, and interviews, this unique book weaves all of this information into a compelling and easy-to-read biography. Here is just a sample of what you'll find inside:
* "My parents weren't all that excited about their son announcing

he was dropping out of a fine university to start a business in something almost nobody had heard of called 'microcomputers.'" * "I think business is very simple. Profit. Loss. Take the sales, subtract the costs, you get this big positive number. The math is quite straightforward." * "I envy people who thrive on three or four hours of sleep a night. They have so much more time to work, learn, and play." * "We never waste a lot of time talking about what we're doing well. It just isn't our culture. Every meeting is about 'Sure, we won in seven of the categories, but what about that eighth category?'" * "The PC industry is the model industry in the entire economy. The rate of

innovation, the openness-all of these things are just fantastic. And Microsoft's role in creating this has been absolutely fundamental." The world listens when Bill gates speaks "I'm not competent to judge his technical ability, but I regard his business savvy as extraordinary. If Bill had started a hot dog stand, he would have become the hot dog king of the world." -Warren Buffett "It is still possible to be a Vanderbilt, an Astor, a Rockefeller. You can still do that, you can be Bill Gates." -David Geffen "Everybody is waiting for this guy to slip. He hasn't slipped, and there's very little chance that he will. Everything that he keeps his hands in will work, and he will win."

-Alan Kerr, Ogilvy & Mather "Love him or hate him, but you can't ignore him." -Fortune

Biography--Bill Gates
 Twenty-First Century Books

I have taught a graduate course on the history of the information and communications industry for 20 years. The course shows students how the world has moved from primitive communication to the integrated multi-media situation we are in today. Concentration is on the fields of journalism,

telecommunications, broadcasting, and computing. Emphasis is placed on the leaders of the areas and the political and cultural surroundings that encouraged or discouraged growth of the industry. It is true that technology is a driving force of this industry, but it has been the individual people (characters) impelled by discovery, acceptance and marketability of that technology who have taken the next step to improve communication. The Journalism field started with Gutenberg and early added Ben Franklin, later it got a little yellow with Hearst and Pulitzer. I think Henry Luce started the business of media integration, but Rupert Murdoch certainly

keeps it going. The first practical use of electricity was found by Samuel Morse and his telegraph. Bell invented the telephone, or was it Meucci? Theodore Vail invented the Bell System. Broadcasting started with Marconis invention, or was it Teslas? David Sarnoff and William Paley made the medium practical and characters like Edwin R. Morrow, Walter Cronkite and even Oprah Winfrey gave it credibility. Certainly Charles Babbage and Ada Lovelace had something to do with the start of computers, but later scientists Vannevar bush and Jon von Neumann added the electronics. Then UNIVAC convinced Thomas Watson Junior that IBM better start

making them. Jobs and Wozniac started the personal computer business, but Bill Gates created the software to make them run. Tim Berners-Lee hooked those computers to a network and then Amazon, eBay, and Google found a way to make money using the result. This book is the story of these people and companies.
