Los deberes deontológicos que encierra el ejercicio de la abogacía, su carácter de profesión liberal y el trascendental servicio a favor de la justicia que desempeña la cualifican y distinguen respecto de otras profesiones. Esta singularidad determina que la relación del abogado con su cliente presente una regulación jurídica propia, cuya naturaleza encuentra acomodo en sede de Derecho civil, aunque con una "mercantilidad" cada vez más acuciante. El elemento central de esta relación gira en torno al contrato de servicios que entre cliente y abogado se concierta, y que de formalizarse por escrito, como así se aconseja, adquiere habitualmente modelo de hoja de encargo. El contenido normativo de este especial sistema de contratación, orquestado por los códigos de deontología y las normas legales estatutarias que articulan la profesión letrada, da cuenta del marcado carácter fiduciario inherente a la relación abogado-cliente, principalmente en materia de diligencia debida, secreto profesional, conflictos de interés, deberes de información y honorarios. La obra incluye, como anexos, formularios y modelos útiles para la actividad diaria del abogado, casos prácticos, así como un amplio cuestionario de 120 preguntas en el que se desgrana el contenido del Código Deontológico y cuya resolución garantiza al que lo desarrolle el conocimiento de la normativa en el mismo incluida.

Compensation for Personal Injury in English, German and Italian Law Harper Collins

Damages for non-

pecuniary loss are the subject of widespread interest in Europe.

They were chosen as one of the initial projects of the Centre for Tort and Insurance Law, Vienna.

The Centre is by no means the first in the field in examining this topic

but our exercise has sought to place the problem in the broader framework of the various legal systems and to go beyond the usual context of personal injury by accident.

The comparative report is mainly based upon information supplied by colleagues in 10 European countries. The working method was a questionnaire issued in the summer of 1999, on the basis of which

there were ten detailed country reports which are published in this volume.

However, information has also been included from Portugal, South Africa, Sweden, the United States and Israel.

The Israeli report is also published in an appendix in this volume.

Colleagues from those countries supplied material during an exercise in 1999 by the European Group on Tort Law on the law of damages in general, directed by Professor Ulrich Magnus (report forthcoming).

A preliminary comparative report was made to a meeting in Munich on 28 and

29 April 2000 attended by persons who had supplied country reports, other

members of the European Group on Tort Law and by representatives of Munich

Reinsurance, who have supported the Centre and shown a close interest in this project. A draft final

report was presented at a symposium in Munich on 13

October 2000 hosted by Munich Re and attended by lawyers and insurers from a wider range of European countries. Dr.

Stefan Heyd of Munich Re and Profes

sor Pierre Tercier of the University of Fribourg also addressed the symposium

and their contributions are included in this volume (see XIII and Appendix 2).

The final comparative report owes much to the discussions at both the meeting in Munich.

Finally, we express our gratitude for the most valuable help of Dr.

Sabine Gantner, Donna Stockenhuber M. A. and Dr.

Friedrich Poppin preparing the manuscript for the publisher. 2 W. V.

in particular the books of Pfennigstorfer and of McIntosh and Holmes on

personal injury damages in Europe and the work for

the European Parliament of the Group coordinated by Prof.

Busnelli of Pisa (who has contributed to this volume). 2 The law

moves on. Since the material was submitted for

press there have been "expansive" movements in England on

privacy and exemplary damages. No doubt

other systems have also seen changes.

But law books are inevitably snapshots. Table of Contents

Since it was first published in 1995, *The Wounded Storyteller* has occupied a unique place in the body of work on illness. Both the collective portrait of a so-called "remission society" of those who suffer from some type of illness or disability and a cogent analysis of their stories within a larger framework of narrative theory, Arthur W. Frank's book has reached a large and diverse readership including the ill, medical professionals, and scholars of literary theory. Drawing on the work of authors such as Oliver Sacks, Anatole Broyard, Norman Cousins, and Audre Lorde, as well as from people he met during the years he spent among different illness groups, Frank recounts a stirring collection of illness stories, ranging from the well-known—Gilda Radner's battle with ovarian cancer—to the private testimonials of people with cancer, chronic fatigue syndrome, and disabilities. Their stories are more than accounts of personal suffering: they abound with moral choices and point to a social ethic. In this new edition Frank adds a preface describing the personal and cultural times when the first edition was written. His new afterword extends the book's argument significantly, writing about storytelling and experience, other modes of illness narration, and a version of hope that is both realistic and aspirational. Reflecting on both his own life during the creation of the first edition and the conclusions of the book itself, Frank reminds us of the power of storytelling as way to understanding our own suffering.

The study of law and politics is one of the foundation stones of the discipline of political science, and it has been one of the most productive areas of cross-fertilization between the various subfields of political science and between political science and other cognate disciplines. This Handbook provides a comprehensive survey of the field of law and politics in all its diversity, ranging from such traditional subjects as theories of jurisprudence, constitutionalism, judicial politics and law-and-society to such re-emerging subjects as comparative judicial politics, international law, and democratization. The Oxford Handbook of Law and Politics gathers together leading scholars in the field to assess key literatures shaping the discipline today and to help set the direction of research in the decade ahead.

La partición realizada por contador partidor testamentario

Franklin Classics

El estrecho margen que el artículo 1057 del Código civil, unido a las presiones a que con frecuencia someten los herederos a los contadores-partidores y al hecho cierto de que éstos no tengan interés propio en el relictum trae consigo que una figura como el contador-partidor no ocupa un puesto destacado en los estudios doctrinales, por más que los mismos no hayan sido escasos en nuestro país. Por ello, el interés de la nueva obra del profesor Manuel Espejo radica en que, teniendo una estructura sumamente clásica que pasa por estudiar la partición en su conjunto (con su evolución histórica, sus clases, su objeto, forma y naturaleza jurídica) y la figura del contador-partidor en su dimensión estática -elementos- y dinámica -facultades y, en su caso, invalidez de sus actos- hace ver la gran utilidad que la misma está llamada a tener. Pero ello, siempre que se quiera caer en la cuenta de que estamos en presencia de un auténtico albacea, de que cuando el testador designa contador-partidor, los herederos han de estar y pasar por la partición que realice el designado, de que el contador-partidor puede realizar adjudicaciones o de que tiene también la facultad de interpretar la voluntad testamentaria. En fin, la obra destaca que, diga lo que diga el citado precepto, la facultad de hacer la partición no es precisamente "simple". Manuel Espejo Ruiz es abogado y Profesor de Derecho civil en la Universidad de Córdoba.

The contributions in this volume illustrate some noteworthy tendencies in current Corpus-based Translation and Interpreting Studies: the reflection on the state of research on the characteristics of translated language, the extension of descriptive proposals into minority languages, the diversification of applied proposals and the growing importance of corpora for the study of interpreting. Las aportaciones de este volumen representan algunas tendencias destacables en los actuales estudios traductológicos basados en corpus: la reflexión sobre el estado de la investigación en torno a las características de la lengua traducida, la extensión de las propuestas descriptivas a

lenguas minoritarias, la diversificación de las propuestas

aplicadas y la creciente importancia de los corpus para el estudio de la interpretación.
